

IZNIK

Tiles and Ceramics

Our TILES

Our tiles are fully handmade. Also, from the biscuit to the paint, every ingredient of our tiles are made in house.

Our products are made out of quartz, this means they are 85% of gemstone. This gives our products unique properties.

Iznik tiles contain 4 layers: biscuit, coating, paint and glaze. All tiles are fired twice for several days.

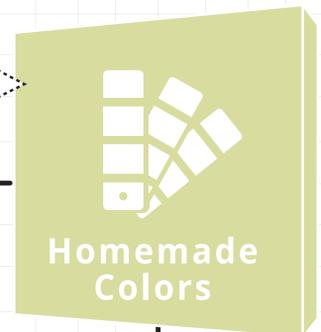

Iznik tiles are extremely durable, highly resistant to change in temperature or humidity. The underglaze protects the decoration underneath.

No harmful chemicals are used during the production process. All ingredients are natural non hazardous, non toxic materials.

All colors are produced in house. It took years of experiments to rediscover the correct mixture. Applied correctly, the vibrant colors will last for hundreds of years.

We offer our tiles in various lines, ranging from single color tiles and geometrical designs to fully personalized designs such as corporate logos.

In addition to hundreds of designs, we produce tiles in various shapes and sizes to fit a wide variety of applications.

Iznik tiles are highly versatile in use and can be applied on walls, floors and ceilings, both indoor and outdoor.
